FRIGATE DEVELOPMENT ENGINEER

International Systems Management Corp. (ISM) is seeking a qualified individual for a full-time position to provide systems engineering and program management support to the Program Executive Office for Integrated Warfare Systems LCS and Frigate Integrated Combat System, PEO IWS 8. This position, the **Frigate Development Engineer**, will support PEO IWS 8 on projects associated with the Frigate Combat System.

The Frigate Development Engineer will be responsible for subject matter expertise in systems engineering and program management that support the Development, Integration, Certification and Fielding within the Frigate Combat System Program. The Frigate Development Engineer will work in a project development environment with government and industry combat system and ship integration engineers and program managers.

Required experience:

- Executing systems engineering processes for USN combat system baseline development, testing, and/or delivery
- DoD 5000.1 Acquisition Milestones
- Supporting engineering or program management tasks for NAVSEA PMS and/or PEO Organizations
- Program Management with multiple stakeholders
- Developing Plans of Action and Milestones and developing and managing technical databases
- Proficient with Microsoft Office Products including Microsoft Excel, Word, PowerPoint and Outlook
- Possess strong communication skills (oral and written) and ability to work independently

Desired experience:

- Developing tactical software for weapon or combat systems
- Familiarity of AEGIS Combat System baseline management, certification, and testing, including modeling and simulation capabilities
- Use of Common Source Library and associated development and testing processes used in support of current USN Baselines
- Supporting US Navy Technical Review Process
- Agile Development Framework
- Contracts experience including Statement of Work development, proposal and Basis of Estimate review, and Technical Advisory Report development
- Working with a team of diverse engineers and acquisition managers

The applicant must have the following minimum experience or qualifications:

- Bachelor's degree in an Engineering, Math or Science Discipline
- DoD security clearance or ability to obtain DoD security clearance
- 5 to 10 years of professional experience in engineering projects

The ideal candidate is dynamic and proactive in meeting customer needs and has the ability to

prioritize tasks and coordinate activities across numerous organizations. The position will be located in Washington, DC and will require travel approximately less than 10% of the time.

ISM is a growing small business providing exceptional technical and program management services to the Department of Defense (DoD). ISM employees are experienced professionals that work well independently, or as part of a large government-industry team. The staff interacts at all levels of DoD and Industry and has a proven track record in achieving positive engineering and program management results.

ISM offers competitive salaries and a very comprehensive benefits package. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, or national origin. Interested individuals should email resumes to resumes@ism-hq.com or fax 240-331-3091.
